

Complete Indoor Mold Protection

"EPA Registered and third party lab certified surface protection. Prevents mold, mildew, fungi, algae and bacteria"

How It Works

When applied to any surface, **SmartShield XLC™** establishes an invisible, microscopic barrier that prevents microbial growth. With our unique formulation SmartShield XLC™ pre-treats as it bonds to surfaces.

The secret behind SmartShield XLC™ is that it incorporates the worlds first nano engineered molecule, which creates a barrier that physically disrupts the ability of bacteria, mold, mildew and algae to thrive on any surface. The end result is the elimination of odor and stain causing organisms, specifically - bacteria, mold, mildew, fungi and algae.

SmartShield XLC™ is a water-based solution that can be applied to all hard and porous surfaces. An optional extended 5 Year Mold Prevention Warranty is available.*

* For use on interior walls and indoors surfaces that are not subject to abrasion.

Benefits

- Approved for all building surfaces including interior block and concrete foundations, interior wood trusses, flooring, joists, framing and interior walls.
- Creates an anti-mold, anti-mildew barrier in crawl spaces, basements and attics.
- Easy to Apply, No Solvents or Corrosive Ingredients.
- Five Year Mold Prevention Warranty. (Optional)
- Available in Economical Concentrate and Ready-To Use formulas.

EPA Reg. No. 87583-2-88566, 87583-3-88566, EPA EST. 74348-FL-1

One Application, Ninety Day* Protection...

Stops the growth and reproduction of bacteria, mold mildew, fungus and algae on surfaces for 90 days.

Microbial-Shield SmartShield XLC™ contains a long lasting, non-selective antimicrobial that inhibits microbial growth on all hard and porous surfaces.

Mold Shield-One simple application of SmartShield XLC™ prevents mold, mildew, fungus and algae growth on all surfaces.

Odor Shield Most odors, such as those caused by mold, mildew & urine, are caused by bacteria. SmartShield XLC™ prevents bacterial growth on all applied surfaces.

Benefits

Long lasting antimicrobial protection that is easy to use and apply. Can be used indoors and outdoors, is invisible and will not change surface appearance. Works in a dry state - Does not cross-contaminate.

•90 days proven efficacy on regularly contacted surfaces. Some areas may last longer or shorter based on abrasive conditions.

Applications

- Fitness Centers & Locker Rooms
- Kitchens, Showers & Bathrooms
- Equipment, Mats and Uniforms
- Public Schools
- Parochial Schools
- Colleges and Universities
- Doctors Offices & Waiting Rooms
- Wheel Chairs, Walkers
- EMT Vehicles & Police Vehicles
- Mold & Mildew Prevention
- Water Damage Restoration
- Building Exteriors & Roofs
- School Buses
- Limousines
- Rental Cars & Taxis
- Public Transportation
